Summary

Healthcare Analyst and Database Specialist with 8 years of experience in oncology and hospital databases.

Expert in researching, evaluating, and analyzing healthcare data to identify trends, discrepancies, and actionable insights.

Proficient in SQL, Python (Pandas, NumPy), Power BI, Crystal Reports, Microsoft Power Automate, and strong **mathematical skills** for statistical analysis.

Skilled in ICD-O Topography & Morphology coding, healthcare quality improvement, record-keeping, and presenting actionable insights to management.

Experienced in designing, tracking, and reporting **clinical and operational KPIs** to support data-driven decision-making.

Skills

Healthcare Analysis: Data evaluation, Trends Analysis, Reporting, Policy Guidelines, Healthcare Quality, KPI Development & Monitoring

Database: SQL Server, MS Access, Database Administration, Advanced SQL Queries, Query Optimization

Programming & Analytics: Python (Pandas, NumPy), Data Cleaning, Data Preprocessing, Statistical Analysis, Mathematical Skills

BI & Reporting: Power BI Dashboards, Crystal Reports, KPI Dashboards, Microsoft Power Automate

Healthcare Data: ICD-O Coding (Topography & Morphology), Oncology Database Management

Other Tools: Advanced Microsoft Excel, Data Validation, Record-Keeping Procedures, Healthcare Procedures

Experience

Shefaa Al Orman Hospitals

Jan 2020 – Present

Healthcare Analyst / Database Specialist

Egypt

- Research and evaluate healthcare data from multiple sources to identify trends, discrepancies, and actionable insights.
- Develop and implement record-keeping procedures and ensure data quality across hospital and oncology databases.
- Prepare reports and dashboards (Power BI, Crystal Reports) to communicate trends, performance metrics, and insights to management.
- Design, track, and monitor **hospital and oncology KPIs** to measure performance, identify areas for improvement, and support data-driven decision-making.
- Collaborate with internal departments to implement improvements in healthcare operations and data management.
- Automate reporting workflows using Microsoft Power Automate to improve efficiency and accuracy.

Shefaa Al Orman Hospitals

Jan 2016 – Dec 2019

Medical Records Specialist

Egypt

- Managed electronic medical records and ensured compliance with healthcare data standards.
- Assisted in oncology data entry, ICD-O updates, registry maintenance, and policy documentation.
- Supported generation and tracking of operational KPIs to enhance departmental performance and reporting accuracy.

Education

South Valley University

Sep 2011

Bachelor of Arts

Egypt

South Valley University

Sep 2014

General Educational Diploma

Egypt

Certifications

Introduction to Cybersecurity – Cisco

Cybersecurity Essentials – Cisco

ICDL – Egypt Maharty Academy

Analyzing and Visualizing Data with Microsoft Power BI – AMIT Learning Academy

Courses & Training

Amadeus System – EGY Trust Academy

Web Developer – Udacity

Database Administration – Global Knowledge Egypt (Skillsoft)

Cloud App Development Track – Global Knowledge Egypt (Skillsoft)

Awards

SGH Award (Caring Like Family) 2024 – Saudi German Health

Projects & Research

Breast Cancer Prediction Project – MIT Jameel Clinic

Artificial Intelligence & Data Analysis

2026

Collaboration with MIT, USA

Tumor Registry Annual Report – Shefaa Al Orman Hospitals

Data Analysis & Reporting

* with visualizations (charts, images, maps) to support oncology decisions.
